

Spring Clean-Up 2018

The Public Works Department has begun roadside repairs and has also been removing downed trees and limbs from this winter's storms. We plan to begin street sweeping in the near future. The department typically conducts an annual brush pickup only on odd numbered years, however due to the extent of tree damage from this winter's storms the Selectmen have requested that we perform a town-wide brush pickup this Spring. If you have storm related brush that you would like picked up, please have it at the edge of road no later than **April 30, 2018**. Feel free to notify the Public Works Department of roadside repairs or brush needing to be picked up. Due to the amount of requested storm related work, it is likely that street sweeping and other roadway cleanup and repairs will be completed later than normal.
